

## Digestion

is the process of converting the foods we eat into substances our bodies can eventually absorb at the cellular level.

Digestive enzymes are proteins that break down the fats, proteins, and carbohydrates we ingest so our tissues and organs can use them. The digestive process has a domino effect on our overall health. Our bodies cannot assimilate nutrients from the foods we eat, unless they are properly digested. We can buy all-natural foods and use cooking techniques designed to preserve food integrity, but in the absence of thorough digestion and enzymatic action, the cells in our bodies will fail to get all the nutrients these foods can provide. Protein digestion, in particular, is essential to cellular health. Undigested protein decomposes in the intestines, never reaching intended cellular targets and often causing gastrointestinal discomfort.

### *The History & Principles Of Standard Process*

Founded in 1929 by Dr. Royal Lee, Standard Process has been a leader in the field of natural whole food supplements for more than 75 years. Dr. Royal Lee believed that, "The quality of a whole food supplement is dependent on the quality of the manufacturing process." This remains the foundation of the Standard Process doctrine today.

Owned and operated by relatives of Dr. Lee, Standard Process manufactures its supplements from start to finish at its facility located in the heartland of America: Palmyra, Wisconsin. Beginning at the company's 1,000 acres of farmland and continuing through the final stages of our unique processing, Standard Process provides the highest quality food supplements available.

# How Zypan® Keeps You Healthy

## Supports the healthy digestion and absorption of proteins

Zypan is comprised of betaine hydrochloride, digestive enzymes, and pancreatin to provide broad support for efficient protein digestion and absorption. These different ingredients work together to help essential nutrients reach their cellular destinations and reduce the likelihood of gastrointestinal discomfort.\*

## The following whole food ingredients in Zypan provide supportive benefits:

### Betaine hydrochloride

- ❖ Betaine hydrochloride helps maintain healthy hydrochloric acid levels in the stomach and throughout the gastrointestinal tract. Proper secretion of enzymes and acids in the stomach create a healthy environment for effective digestion of foods.\*

### Pancreas Cytosol™ extract

- ❖ The pancreas manufactures a number of important enzymes that aid in digestion. Pancreas Cytosol™ extract contains the building blocks of the pancreas to support healthy pancreatic function. Pancreas Cytosol™ extract is derived from bovine pancreas tissue using a unique and patented process engineered by Dr. Royal Lee, founder of Standard Process Inc.\*

### Pancreatin

- ❖ Pancreatin is a source of proteolytic enzymes that plays a significant role in protein digestion. Research suggests this enzyme helps support immune function and the body's natural inflammatory processes, as well as cellular protective properties.\*

### Pepsin

- ❖ Pepsin, a digestive enzyme secreted by the stomach, ignites the process of protein digestion.\*

### Bovine and ovine glandulars

- ❖ Provide cells with specific raw materials to help them restore, repair, and regenerate themselves.\*

## Four Benefits of Zypan®

The whole food ingredients found in Zypan offer a natural formula, created specifically to support the healthy digestion and absorption of proteins by:

- ❖ Providing multiple proteolytic enzymes
- ❖ Supplying betaine hydrochloride to encourage healthy hydrochloric acid levels in the stomach and throughout the gastrointestinal tract
- ❖ Contributing pancreatin to support healthy pancreatic function
- ❖ Maintaining cellular health through efficient nutrient assimilation\*

## Why Standard Process Zypan® is Unique

Zypan, manufactured by Standard Process Inc., contains natural ingredients that provide synergistic cofactors. The benefits of many of the natural ingredients overlap in some areas, yet their combination with other compounds derived from whole food sources offers a unique blend of nutrients to provide optimal activity. Each ingredient offers its nutrients along with synergistic cofactors to provide efficacious nutritional support to both the stomach's physiologic structures and its biochemical processes.\*

## The Whole Food Difference

All Standard Process products are based on one simple belief—good health comes from good nutrition, and the best nutrients come from whole foods. Each supplement formula is built on this holistic paradigm. The whole food ingredients in Zypan provide a natural alternative for helping the digestive system function properly and stay healthy.\*
